EXPERTISE

Management:

- Team Leadership
- Project Delivery
- Stakeholder Coordination
- Process Implementation

Governance:

- Strategic Thinking and Roadmap
- Agentic AI in governance
- Frameworks & Policies Development

Technical:

- Python, SQL, Apache Airflow
- Big Data (GCP, BigQuery, Spark)
- Data Architecture (DWH, Lamda, Kappa)
- DevOps (CI/CD, Docker)

EDUCATION

Master's degree

Higher School of Economics

2020-2022

Business Analytics and Big Data Systems

Bachelor's degree

Higher School of Economics

2016-2020

Applied Mathematics, specialization
"Stochastic Analysis"

CERTIFICATIONS

- IBM Data Analyst
- Data Governance Essentials
- IBM DevOps & Software Engineering
- AI Agents Fundamentals

PROFILE

Data Governance Leader with 6+ years driving enterprise-scale initiatives and proven team leadership across cross-functional environments. Currently architecting Semrush's data governance strategy for 50+ analysts, building scalable frameworks and engineering compliance. Unique combination of deep technical expertise (Python, SQL, Big Data), strong communication skills and demonstrated people leadership, positioning for data leadership roles.

WORK EXPERIENCE

Data Governance Team Lead

Semrush

July 2024 - Present

Data Governance Leader who builds, not just governs. Enables analytics teams through hands-on technical implementation, not just theoretical policies:

- Manage operations of the **Data Governance Team** (3 people)
- Developed a comprehensive two-year **Data Governance strategy** for the analytics division approved by VP
- Designed and developed (Python) **Data Catalog** automation in Confluence (1,500+ tables)
- Designed and scaled **Data Ownership** framework across a team of 50+ analysts

System Analyst

Sibedge (Legato Data Platform)

Aug 2023 - July 2024

Designed authentication architecture for enterprise data platform:

- System Architecture:** Designed RBAC system across 7 data services with complete audit trail
- System Integration Design:** Designed event-driven architecture (Kafka) to maintain consistent user permissions across the entire data ecosystem

Lead Analyst

DECO Systems

July 2022 - Aug 2023

Analytics team lead on the project to integrate Data Warehouse and BI reporting.

- Team Leadership:** Led cross-functional team of 6 analysts and engineers, establishing development standards and best practices
- Technical Architecture:** Implemented Data Vault 2.0 methodology for 100+ tables across 6 source systems
- Project Delivery:** Successfully delivered corporate data warehouse on time and within budget constraints

Business Intelligence Analyst

TechAudit

Aug 2019 - June 2022

Delivered end-to-end analytical solutions for major retail and B2B clients, transforming business challenges into actionable insights:

- Supply Chain Optimization:** Developed inventory management dashboards reducing VkusVill operational costs by 12% through predictive analytics
- Demand Forecasting:** Implemented SARIMAX models achieving sub-10% error rates, enabling proactive inventory planning
- Production Systems:** Delivered 30+ operational dashboards across visualization platforms with automated data pipelines
